INVESTMENT STRATEGY:

The Scheme endeavor to protect capital by investing a portion of the portfolio in highest rated debt securities & money market instruments and also to provide capital appreciation by investing the balance in equity and equity related securities. The allocation to equity and equity related securities would depend on interest rates prevailing at the time of deployment of funds in debt securities and the time horizon of each plan. It would typically be equal to the interest amount that can be earned from the debt securities for the tenure of the investment.

- The Scheme will follow a passive investment strategy for the fixed income component of the Scheme. The Scheme will invest in fixed income securities with a view to hold them till the maturity. To that effect the Scheme will follow a buy and hold strategy to investment in fixed income instruments.
- Exposure to the securities rated by CARE at all times shall not exceed 20% of the Assets under Management (AUM) of the Scheme. The restriction shall continue to apply even in cases where the security is rated by CARE and any other Agency. However, this limit will not apply to securities issued by a Public Sector Undertaking (PSU). Any change due to change in the market conditions resulting in an increase in exposure beyond the specified limit of 20%, the exposure will be brought down within a period of 30 days.
- The yield on debt securities at the time of purchase shall not be more than 100 bps to the benchmark yield as stipulated under respective CRISIL & ICRA Bond Matrix as applicable to AAA instruments.
- The fixed income component of the Scheme shall be invested in Central government securities or debt securities issued by corporate rated at AAA or equivalent rating
- The Scheme is 'oriented towards protection of capital' and not with 'guaranteed returns'. Further, the orientation towards protection of capital

originates from the portfolio structure of the Scheme and not from any bank guarantee, insurance cover, etc.

- The Scheme shall endeavour to ensure capital protection by investing in debt the allocation not below the CARE indicative allocation at the time of launch. Capital protection will be provided solely through the fixed income part of the portfolio and the same shall be invested in securities that mature to capital value at the end of the Scheme.
- The debt component of the portfolio will always have the highest investment rate grading (AAA rating or equivalent from a rating agency).
- Whenever asset allocation is altered for defensive considerations, the AMC shall endeavour to ensure that the capital remains protected on maturity and also that the rating of the Scheme is not adversely affected.
- Fund manager may alter the asset allocation during subsequent deployment of funds provided such deployment is generated out of appreciation in value of existing investments. While making such asset allocations, fund manager would endeavor that capital remains protected on maturity and ensure rating of the Scheme is not adversely impacted.

RISK PROFILE OF THE SCHEME:

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme Specific Risk Factors summarised below.

Scheme Specific Risk Factors and Risk Management Strategies:

- a) The Scheme offered is "oriented towards protection of capital" and "not with guaranteed returns". The orientation towards protection of the capital originates from the portfolio structure of the Scheme and not from any bank guarantee, insurance cover etc.
- b) The ability of the portfolio to meet capital protection on maturity to the investors can be impacted in certain circumstances by changes in government policies, interest rate movements in the market, credit defaults by bonds, expenses, reinvestment risk and risk associated with trading volumes, liquidity and settlement systems in equity and debt markets. Accordingly, investors may lose part or all of their investment (including original amount invested) in the Scheme. No guarantee or assurance, express or implied, is given that investors will receive the capital protected value at maturity or any other returns.
- c) The rating provided by CARE, only assesses the degree of certainty for achieving the objective of the Scheme i.e. capital protection and does not denote any opinion on the stability of the NAV of the Scheme. The rating should, however, not be construed as an indication of expected returns, prospective performance of the mutual fund scheme, NAV or of volatility in its returns. The rating would be reviewed on a quarterly basis by CARE.
- d) CARE reserves the right to suspend, withdraw or revise the ratings assigned to the portfolio structure of this scheme at any time, on the basis of any new information or unavailability of information or any other circumstances, which the Rating Agency believe may have impact on the above rating.
- e) The rating, as aforesaid, however, should not be treated as a recommendation to buy, sell or hold the units issued by ICICI Prudential Mutual Fund under ICICI Prudential Capital Protection Oriented Fund V – Plan F – 1100 Days. The rating is restricted to the portfolio structure of ICICI Prudential Capital Protection Oriented Fund V – Plan F – 1100 Days only. CARE does not assume any responsibility on its part, for any liability that may arise consequent to the non compliance of any guidelines or directives issued by SEBI or any other mutual fund regulatory body.
- f) The rating is based on current information furnished to the Rating Agency by the issuer or obtained by the rating Agency from sources it considers reliable. The rating Agency do not, however, guarantee the accuracy, adequacy or completeness of any information and are not responsible for any errors or omissions or for the results obtained from the use of such information.
- g) The Asset Management Company shall not repurchase units of ICICI Prudential Capital Protection Oriented Fund V – Plan F – 1100 Days (the Scheme) before end of the maturity period. However, the Scheme may be listed on one or more Stock Exchange(s) in India at the discretion of the Trustees.
- h) Investors in the Scheme are not being offered any guaranteed / assured returns.
- i) The Trustees, AMC, Fund, their directors or their employees shall not be liable for any tax consequences that may arise in the event that the Scheme is wound up for the reasons and in the manner provided under the Scheme Information Document.
- j) Redemption by the Unit Holder due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustees, AMC, Fund their directors or their employees shall not be liable for any tax consequences that may arise.

Risks associated with investing in Equities and Derivatives:

Investors may note that AMC/Fund Manager's investment decisions may not be always profitable. The Scheme proposes to invest in equity and equity related securities. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme

to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the Scheme's portfolio due to the absence of a well developed and liquid secondary market for debt securities would result, at times, in potential losses to the Scheme, in case of a subsequent decline in the value of securities held in the Scheme's portfolio.

The Scheme is also vulnerable to movements in the prices of securities invested by the Scheme, which again could have a material bearing on the overall returns from the Scheme. These stocks, at times, may be relatively less liquid as compared to growth stocks. The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.

The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down.

Investment decisions made by the AMC may not always be profitable, as actual market movements may be at variance with anticipated trends.

The performance of the Scheme will be affected in case of unforeseen circumstances like political crisis, natural calamities, and changes in currency exchange rates or interest rates. Fund manager tries to generate returns based on certain past statistical trend. The performance of the Scheme may get affected if there is a change in the said trend. There can be no assurance that such historical trends will continue.

In case of abnormal circumstances it will be difficult to complete the square off transaction due to liquidity being poor in stock futures/spot market. However fund will aim at taking exposure only into liquid stocks where there will be minimal risk to square off the transaction.

Risks associated with Investing in Securitised Debt

The Scheme shall not invest in securitised debt.

Risks associated with Short Selling and Securities Lending

The Scheme will not do 'Short Selling' and 'Stock Lending' activity.

Risks attached with investments in ADRs/GDRs/ overseas securities:

The investment in ADRs/GDRs/overseas securities offer new investment and portfolio diversification opportunities into multi-market and multi-currency products. However, such investments also entail additional risks. Such investment opportunities may be pursued by the AMC provided they are considered appropriate in terms of the overall investment objectives of the schemes. Since the Schemes would invest only partially in ADRs/GDRs/overseas securities, there may not be readily available and widely accepted benchmarks to measure performance of the Schemes. To manage risks associated with foreign currency and interest rate exposure, the Fund may use derivatives for portfolio rebalancing and/or hedging, and in accordance with conditions as may be stipulated by SEBI/RBI from time to time.

To the extent that the assets of the Schemes will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by the changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital also may be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of the other restrictions on investment.

Offshore investments will be made subject to any/all approvals, conditions thereof as may be stipulated by SEBI/RBI and provided such investments do not result in expenses to the Fund in excess of the ceiling on expenses prescribed by and consistent with costs and expenses attendant to international investing. The Fund may, where necessary, appoint other intermediaries of repute as advisors, custodian/sub-custodians etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceilings of expenses. The fees and expenses would illustratively include, besides the investment management fees, custody fees and costs, fees of appointed advisors and sub-managers, transaction costs, and overseas regulatory costs.

Risk management strategies: The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in debt markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Fund has identified following risks of investing in debt and other securities and designed risk management strategies, which are embedded in the investment process to manage such risks.

Risk & Description specific to Debt investments	Risk mitigants / management strategy
<p>Market Risk</p> <p>As with all debt securities, changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.</p>	<p>The fund will invest in a basket of debt and money market securities maturing on or before maturity of the fund with a view to hold them till the maturity of the fund. While the interim NAV will fluctuate in response to changes in interest rates, the final NAV will be more stable. To that extent the interest rate risk will be mitigated at the maturity of the Scheme.</p>
<p>Liquidity or Marketability Risk</p> <p>This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.</p>	<p>The Scheme may invest in government securities, corporate bonds and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds.</p> <p>Liquidity risk is today characteristic of the Indian fixed income market. The fund will however, endeavor to minimise liquidity risk by investing in securities having a liquid market.</p>
<p>Credit Risk</p> <p>Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.</p>	<p>A traditional SWOT analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken to review its ability to undergo stress on cash flows and asset quality. A detailed evaluation of accounting policies, off-balance sheet exposures, notes, auditors' comments and disclosure standards will also be made to assess the overall financial risk of the potential borrower.</p>
<p>Reinvestment Risk</p> <p>This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.</p>	<p>Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.</p>

Derivatives Risk	
<p>As and when the Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives that Investors should understand. Derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the correlate perfectly with inability of derivatives to underlying assets, rates and indices.</p>	<p>The fund has provision for using derivative instruments for portfolio balancing and/or hedging purposes. Interest Rate Swaps will be done with approved counter parties under pre approved ISDA agreements. Mark to Market of swaps, netting off of cash flow and default provision clauses will be provided as per international best practice on a reciprocal basis. Interest rate swaps and other derivative instruments will be used as per local (RBI and SEBI) regulatory guidelines.</p>

Risks associated with Equity / Equity related investment	
<p>Market Risk</p> <p>The Scheme is vulnerable to movements in the prices of securities invested by the Scheme, which could have a material bearing on the overall returns from the Scheme. The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume, volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets.</p>	<p>Market risk is a risk which is inherent to an equity scheme. The Scheme may use derivatives to limit this risk.</p>
<p>Liquidity risk</p> <p>The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.</p>	<p>The fund will be a high risk, high return fund and the time horizon, until the market realizes the true value of the stocks that the fund has invested into, could be longer. As such the liquidity of stocks that the fund invests into could be relatively low. The fund will try to maintain a proper asset-liability match to ensure redemption / Maturity payments are made on time and not affected by illiquidity of the underlying stocks.</p>
<p>Derivatives Risk</p> <p>As and when the Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives that Investors should understand. Derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but also</p>	<p>Derivatives will be used for the purpose of hedging/ portfolio balancing purposes. Derivatives will be used in the form of Index Options, Index Futures, Stock Options and Stock Futures and other instruments as may be permitted by SEBI. All derivatives trade will be done only on the exchange with guaranteed settlement.</p>

of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.	No OTC contracts will be entered into.

Risks associated with investment in ADR/ GDR/ overseas securities	
Currency Risk The Scheme may invest in foreign securities as permitted by the concerned regulatory authorities in India. Since the assets may be invested in securities denominated in foreign currency, the INR equivalent of the net assets, distributions and income may be adversely affected by changes / fluctuations in the value of the foreign currencies relative to the INR.	The Scheme may employ various measures (as permitted by SEBI/RBI) including but not restricted to currency hedging (such as currency options and forward currency exchange contracts, currency futures, written call options and purchased put options on currencies and currency swaps), to manage foreign exchange movements arising out of investment in foreign securities.

AMC reserves the right to amend/terminate this facility at any time, keeping in view business/operational exigencies and the same shall be in the best interest of the investors. The investor is being provided a facility to give the switch request from the close ended funds, much in advance of the maturity of the fund. At a future date changes can arise in the target scheme which can prevent the AMC from processing the switch request. In such cases the switch request would be considered NULL & VOID and the investor would have to re-submit the Trigger request. Few examples of such changes are <ol style="list-style-type: none"> Change in fundamental attribute of the target Scheme. Merger of the target scheme into any other scheme. Any change in the target scheme specifications which restricts the AMC from accepting the switch request. For example : Maximum and Minimum amount size. When Target Scheme has stopped accepting fresh subscriptions in the Scheme. In case folio consolidation is requested by the investor, the existing Trigger request would be considered Null & Void. The investor would be allowed to re-register a fresh Trigger request as per existing process. In case of change of broker or change of investment status as "direct" after closing of New Fund Offer, the new broker code would be updated for existing investments and for existing Trigger request. Conversion of physical unit to demat mode will nullify any existing / future Trigger request and the request cannot be re-submitted. Trigger facility will be effected only when the terms and conditions of the said facility is fulfilled. In case of Trigger facility, the switch into the open ended scheme will be subject to applicable cut off timings provisions.
